SUMMARY

I am a 7th semester Information Systems student at Telkom Institute of Technology Purwokerto with a strong interest in software development and UI design. I have skills in HTML, CSS, Javascript, and experience in developing web applications using Laravel. Additionally, I am familiar with RAD methodology, SDLC, and IT project management. I have participated in several academic projects and internships that have provided me practical experience in database management, application development, and user requirement analysis. I am always eager to learn new things and ready to face challenges in the workplace with enthusiasm and dedication.
